

At Terrafibre, we design and build products that exploit the extraordinary mechanical qualities of the industrial hemp plant, most of which was previously considered waste. The strong yet lightweight fibres of the plant provide a sustainable growing media for hydroculture and agriculture from seed propagation through to harvest.

ENVIRONMENTALLY FRIENDLY

PH NEUTRAL

## HEMP FIBRE GROW MATS

Terrafibre Grow Mats are a clean and easy way to grow microgreens, wheatgrass, or other short rotation crops. The mat will provide water and root stabilization in the early growth of the plant cycle. Micro Farmer Kits are a great way to begin your journey with microgreens and each kit includes 5 mats and 3 varieties of seeds.

SIZE	UNITS/PACK	SKU	PRICE
10"x20"	10	GM-1020-10	\$25.00
5"x5"	40	GM-55-40	\$15.00
