LEARN MORE AND CONNECT WITH US @TERRIFIBRE

At TerraFibre, we design and build products that utilize the extraordinary mechanical qualities of the industrial hemp plant, most of which was previously considered waste. The strong yet lightweight fibres of the plant provide a sustainable growing media for hydroculture and agriculture from seed propagation through to harvest.

NATURAL FIBRE GROWING CUBES

Start seeds or root cuttings into a natural fibre growing cube. Suitable for use in hydroponic or soil environments. This biodegradable and compostable cube is suitably sourced by Canadian farmers.

SIZE	UNITS/PACK	PACKS/CASE	SKU
1.5"	9	44	Cube-9-1.5
1.5"	98	16	Cube-98-1.5
1.5"	1568	1	Cube-1568-1.5
2"	4	36	Cube-4-2
2"	50	16	Cube-50-2
2"	800	1	Cube-800-2

NATURAL FIBRE GROWING BLOCKS

SIZE	UNITS/PACK	PACKS/CASE	SKU
4"x4"x2.5"	6	24	Block-4-6
4"x4"x2.5"	144	1	Block-4-144

Transplant your 1.5" cubes to this block to give the roots the extra space they need. For shorter rotation crops, this may be a large enough media or transplant onto the slab or into our loose fill for the remainder of the growth cycle. Blocks have a 1.5" diameter hole on the top and channels along the bottom to increase air flow. Like all Terrafibre products, blocks are fully biodegradable and compostable.

NATURAL FIBRE GROWING SLABS

Transplant the 4" blocks directly on top of our Terrafibre Natural Fibre Slabs to finish the growing cycle of longer cycle plants. Slabs are wrapped in a UV protected black white bag to prevent light from reaching the roots. Same natural fibre composition as the Terrafibre blocks and cubes.

SIZE	UNITS/PACK	PACKS/CASE	SKU
40"x6"x4"	1	12	Slab-4064-1

NATURAL FIBRE LOOSE FILL

SIZE	UNITS/PACK	PACKS/CASE	SKU
1 ft ³	1	4	Loose-1-1

1 cm cubes or "cROUTONS" to fit any soft or hard pot for indoor or outdoor growing. These cubes can also be added to supplement lower water holding media or to provide aeration to clay soil. Transplant from either the cubes or the blocks into this media, you can also transplant from smaller pots with loose fill to larger pots with loose fill.

HEMP FIBRE GROW MATS

SIZE	UNITS/PACK	PACKS/CASE	SKU
10"x20"	10	12	GM-1020-10
10"x20"	140	1	GM-1020-140
5"x5"	40	12	GM-55-40
5"x5"	560	1	GM-55-560
10"x120 ft	1	1	GMR-10120-1
10"x20"	1	1	MK-1-C

Terrafibre Grow Mats are a clean and easy way to grow microgreens, wheatgrass, or other short rotation crops. The mat will provide water and root stabilization in the early growth of the plant cycle. Micro Farmer Kits are a great way to begin your journey with microgreens and each kit includes 5 mats and 3 varieties of seeds.

HEMP FIBRE HYDROPONIC MAT

Use the Terrafibre Hemp Fibre Hydroponic Mat for underneath baskets, slabs, or cubes to prevent roots from drying out. Grow directly on the mat with leafy greens or longer growth microgreens.

SIZE	UNITS/PACK	PACKS/CASE	SKU
4' x 4'	1	9	HM-44-1

TERRAFIBRE MERCHANDISE DISPLAY

SIZE	UNITS/PACK	PACKS/CASE	SKU
1.5"	1	1	Merch-Disp-1.5
2"	1	1	Merch-Disp-2

Terrafibre Merchandise Display includes:

- (1) - Display Stand
- (44) - 9 Pack 1.5" Grow Cubes OR (36) 2" Grow Cubes
- (16) - 98 Slab 1.5" OR 50 Slab 2" Grow Cubes
- (12) - 10 Pack 10" x 20" Grow Mats
- (12) - 40 Pack 5" x 5" Grow Mats
- (9) - 4' x 4' Hydroponic Mats

All Terrafibre products are completely biodegradable and compostable. This merchandise display is the perfect start for a retailer. Choose between 1.5" or 2" grow cubes.
